At Your Service, We are professional competitive competent

We have quality analysis who keep a thorough check on all the products at each and every detail so that not even the minutest flaw occurs which can cause rejection of the product. The quality management guidelines which are framed by us are strictly followed within the organization. Our quality control managers are well aware of their responsibilities and accordingly undertake each and every task. As we have never compromised on quality so we stand high on the paradigms of excellence.

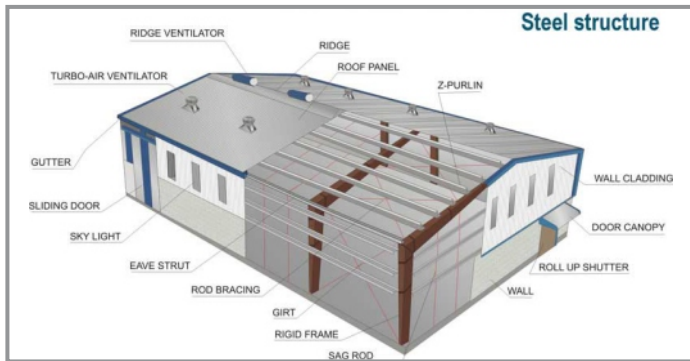

More Than Just A Business We're Redefining Our Industry

Royal Engineering is a professionally managed company since 2005 with vast expertise, we fabricate and supply an enthralling array of Roofing Sheds and Mezzanine Floor. The Sheds and Mezzanine Floor are designed by using supreme quality raw material that is resistant to corrosion, highly durable, strong and compact in design. We also design and develop all types of Material handling equipments. Our designers and developers are well trained and are required to continually interface with our shop stewards and field erection supervisors, to ensure error free manufacturer of your requirements.

Design & Development

We design, and develop all types of fabrication using software, schematic drawings and fabrication shop drawings. Program in use include AutoCad and other software. Full electronic data interchange facilities (EDI), exist to permit transmission of drawings and other information via electronic mail.

More Than Standard Product We Offer Complete Solution for Industrial Structural & Roofings

Terrace Roofing / Bus Shelter / Car Parking

Mould Storage Racks

Mezzanine Floor / Heavy Duty Material Storage Racks

Industrial Trolleys / Pallets

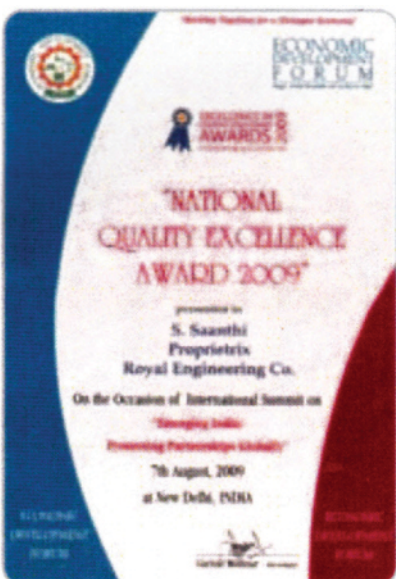

Ensuring Quality Through Certification and Expansion

ISO Certification

In ISO 9001 Certification, highly competent market industries with ISO 9001:2008 certification hold a distinguished position. These industries hold an advantage over others and have gained trust & credibility. The ISO 9001: 2008 quality certification is based on the following eight fundamental quality management principles.

Customer focus | Leadership + Involvement of People | Process approach | System approach to management | Continual improvement | Factual approach to decision making | Mutually beneficial supplier relationships.

EDF Certification

The Excellence in Economic Development Awards is fast becoming a leading programme in recognizing excellence in business development innovation and success in India. Every year, the Economic Development Forum conducts the Excellence in Economic Development Awards programme. EDF's awards programme is regarded with the highest prestige and recognizes the best of the best in the economic development profession.
